PROJECT TOPIC: *G'echo – GLA's Echo*

Programme: MCA

Project Group Members:

1. Rohan Prajapati (A-44/2484200166)
2. Amit Giri (A-04/2484200022)
3. Rajat Singhal (A-39/2484200154)
4. Anshul Parashar (A-26/2484200105)

Project Supervisor: Mr. Shishupal Singh, Technical Trainer

Objective: The main objective of this project is to develop a secure and university-exclusive social media platform that centralizes all communication within GLA University. It aims to streamline event announcements, official updates, and activity posts by providing a single, reliable digital space. The project also focuses on enhancing student engagement through interactive features while maintaining strict role-based access for safety and authenticity.

Tools required:

- **Hardware Requirements:**
- Processor: Intel Core i3 or higher
- RAM: Minimum 4 GB (8 GB recommended)
- Storage: 256 GB HDD/SSD
- Internet Connection **Software Requirements:**
- MongoDB Atlas
- Express.js
- React.js
- Node.js
- Visual Studio Code
- Git & GitHub
- Web Browser

Abstract: This project introduces *G'echo – GLA's Echo*, a campus-exclusive networking platform designed to streamline communication within GLA University. The system provides a controlled environment where only authenticated university members can access and participate, ensuring privacy and reliability. Instead of functioning like open social media, G'echo focuses on structured information sharing, allowing clubs and administrators to publish official announcements and event-related content. Students and faculty members engage through predefined interactions, promoting disciplined participation without unrestricted posting. The platform aims to overcome the inconsistency of scattered communication methods by offering a unified

space for academic updates, cultural activities, and campus events. With its simple interface, secure authentication, and role-based permissions, G'echo contributes to a more connected and informed university community. Overall, the project enhances digital communication by providing a trustworthy medium built specifically for institutional needs.
