ABSTRACT

G'echo – GLA's Echo is a university-exclusive social media platform developed for GLA University, providing a secure and private digital space unlike open platforms. Access is restricted to students, faculties, administrators, and university clubs, ensuring authenticity and safety. Students and faculties can only like and comment on posts, while clubs and administrators are authorized to share photos, videos, and blogs about events and activities.

The platform uses university email credentials for login, eliminating the need for manual sign-ups and preventing fake accounts. By centralizing event updates and official announcements, *G'echo* enhances communication, encourages student participation, and strengthens the digital ecosystem of GLA University, creating an engaging and reliable platform that connects students, faculties, and clubs more effectively.
